THE BLACKSWAN ADVANTAGE

Lower Your Business Risk with Blackswan Cybersecurity

Boost your cybersecurity operations and safeguard your business from cybercrime. Blackswan's comprehensive, multi-signal Managed Detection and Response (MDR) service delivers 24/7 advanced protection, ensuring cybercriminals are stopped before they can disrupt your operations.

Our Difference	24/7 Threat Hunting & Investigation	Concierge 'White Glove' Service	Open XDR Cloud Platform	Rapid Incident Response	Actionable Threat Intelligence
Your Outcome	Blackswan Analysts in our Cyber Fusion Center rapidly investigate, contain, and shutdown threats. Multi-signal intelligence enables deeper correlation and investigation capabilities, proven to contain threats faster.	Blackswan is an extension of your team, providing 24/7 monitoring ("eyes on glass"), guidance and support. Blackswan works with you to proactively protect against threats and remediate threats if or when you are victim of ransomware, a breach or disruption.	Blackswan leverages existing investments in security tools, pulling security intelligence under a single pane of glass. Open XDR (Extended Detection and Response) enables a lower total cost of ownership (compared to layering point solutions).	Clients have 'near real-time detection, experiencing an 8x improvement in meantime to detect a disruption, and a 20x meantime improvement for incident response. Our Cyber Fusion Center automatically analyzes data from the entire attack surface to pinpoint potential cyber threats, ensuring rapid threat detection.	Blackswan provides your team with top-tier threat researchers to uncover the most advanced and elusive threats. Our Cyber Fusion Center provides original research, curates actionable threat intelligence, and develops innovative detection models to keep you one step ahead of cyber attackers.

Zero-Trust Approach for Effective MDR

Blackswan sticks to a zero-trust approach to protect your business from constantly evolving threats. Powered by our Cyber Fusion Center, we deliver unparalleled processing speed and scalability to counter emerging risks. By instantly applying new threat detections across all customer environments, we ensure comprehensive protection for our entire client base.

Blackswan's Cyber Fusion Center serves as the backbone of our MDR service, offering security, reliability, and on-demand scalability. For situations where automated disruption isn't feasible, our 24/7 Cyber Fusion Center Analysts, empowered with enriched intelligence, thoroughly investigate and manually contain threats within minutes.
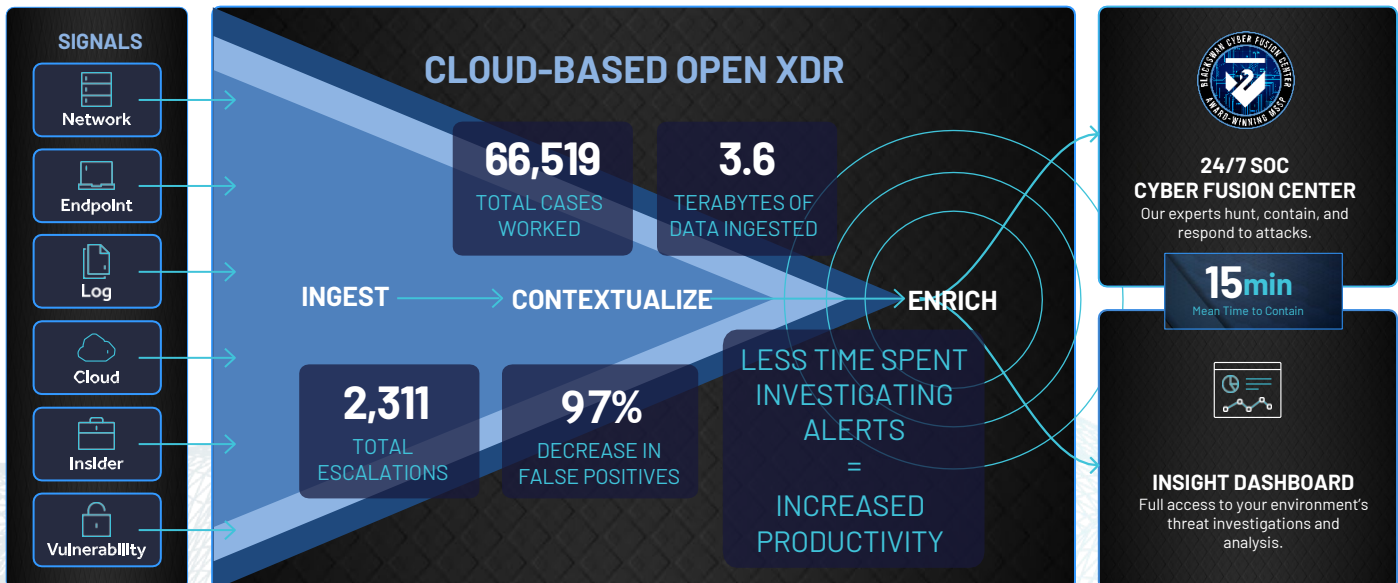

Multi-Signal MDR Enables Full Visibility

At Blackswan, we believe a multi-signal approach is paramount to protecting your complete attack surface. Whether your environment is in the cloud, on-premises or somewhere in-between, we have greater visibility to see what other MDR providers might miss. We ingest Endpoint, Network, Log, Cloud, Email, Identity, Managed Vulnerability, and Insider sources, enabling full visibility, deep investigation, data correlation and most importantly, complete response.

Up Your Game with Blackswan Cybersecurity MDR

	Blackswan Cybersecurity	The Other Guys
24/7 Always-On Monitoring	✔	Limited
24/7 Live SOC Cyber Analyst Support	✔	Limited
24/7 Threat Hunting	✔	✘
24/7 Threat Disruption and Containment Support	✔	✘
Mean Time to Contain 15 Mins	✔	✘
Powerful Machine Learning XDR Cloud Platform	✔	✘
Multi-Signal Visibility & Coverage (Endpoint, Network, Log, Cloud, Email, Identity, Vulnerability, Insider)	✔	✘
Automated Detections with Signatures, IOCs and IPs	✔	Limited
Detections Mapped to MITRE ATT&CK Framework	✔	Limited
Detection of unknown attacks leveraging patterns and behavioral analytics	✔	Limited
Alerting of Suspicious Behavior	✔	Limited
Confirmation of True Positives	✔	Limited
Rapid Human-Led Investigations	✔	Limited
Threat Isolation and Containment	✔	Limited
Remediation Support & Verification	✔	Limited
Real-time Portal Visualizations	✔	Limited
Threat Advisories, Research, and Thought Leadership	✔	Limited
vCISO Services	✔	✘
Additional Security Services including Managed Phishing and Security Awareness Training, Security Incident Response Planning, Emergency Incident Response and more	✔	Limited

Blackswan's proactive approach to identifying and mitigating risks has been crucial in safeguarding our organization and our clients. Your innovative solutions and commitment to staying ahead of emerging threats have not only protected our digital assets but have also inspired confidence in our ability to navigate the rapidly changing cybersecurity landscape.

BLACKSWAN CYBERSECURITY

Blackswan Cybersecurity is a leader in fit-for-purpose cybersecurity solutions. Blackswan helps companies identify the right safeguards for protecting their data assets and outperforming cybersecurity compliance requirements by offering customizable, comprehensive suite of skills, capabilities, and services. These services range from comprehensive 24/7/365 managed security services (SOC-as-a-service), assessment-level gap analysis, vulnerability identification and remediation, incident and breach response, user awareness training, GRC assessments and analysis, and virtual CISO services. Powered by Blackswan's Fusion Center, Blackswan Cybersecurity provides around-the-clock access to cyber professionals and 'eyes-on-glass' threat monitoring, detection, and remediation services from their North Texas-based Cyber Fusion Center (SOC evolved).
